

HVR International Ltd.

HVR International is a world leader in the manufacture of Ceramic Carbon, High Voltage, High Energy Non Inductive Resistors:

- High Voltage Withstand • Non - Inductive • High Surge Energy Rating • 100 % Active Volume • Air / Oil / SF6 Environments • Water / Air Cooled Variants • PCB & Direct Busbar Mounting • Clamp, Wire & Screw Terminations • Wide Range of Geometries • Wide Resistivity Range • Free Design Service • Customised Versions Available

HVR Resistors are capable of sustaining energies ranging from joules to Mega-joules, at frequencies up to Mega-Hz.

Applications include: Pulse Power, Dummy Loads, Lasers, Electrical Transmission, Traction, AC/DC Drives and Pulse Forming Networks.

Major accounts where HVR International Ltd are fully approved include:

- ABB – Worldwide • Siemens – Worldwide • Mitsubishi – Japan
- Hyundai – Korea • Philips – Germany • Eupec – Germany
